

Sean Sheppard – President
EMBRACE
San Diego, California

October 21, 2015

Dear Mr. Sheppard.

This letter is to confirm my direct and focused involvement in the ongoing work and continued success of EMBRACE. As defined by you, my role will be to design, test, and implement scientific efficacy measurement tools that will be administered using a pre- and post-test protocol.

As per your request, I have identified contacted my colleagues who are established and competent college and university faculty members. These individuals teach and in the area of tests, measurement, and data analysis.

Professor Elizabeth Stanton, Chair of the Psychology Department at San Diego Christian College has expressed her interest in contributing to the success of EMBRACE. My colleague at California State University @ Fullerton, Jeff Eyanson is has been teaching measurement and data analysis at Cal State Fullerton and for San Diego Christian College for several years and is very accomplished in this area.

I look forward to contributing to the great work and continued success of EMBRACE and pledge to provide the resources necessary to succeed.

Robert A. Mechikoff, Ph.D.
